DETAILED ACTION

Election/Restrictions

1. Applicant elected claims 1-27, 39-44, 46-62, and 66-73 without traverse and cancelled claims 28-38, 45, 63-65, and 74 on 8/24/04
2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of forming light emitting device:

- A1. Shaping, removing, or patterning of a substrate.
- A2. Blanket annealing of a substrate.

If applicant selects species A1, applicant must further elect from the shape of three-dimensional geometric patterns:

- B1. Parabolic features.
- B2. Curved features.
- B3. Lenses features.
- B4. Sinusoidal groove features.
- B5. Different or randomized features

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
